SU - 1400 SHARK SHIELD SURF MOUNTING PLATE

Additional mounting plate allows you to move your Shark Shield™ Surf from one board to another.

SU - 1804 HARD SHARK SHIELD CARRY CASE

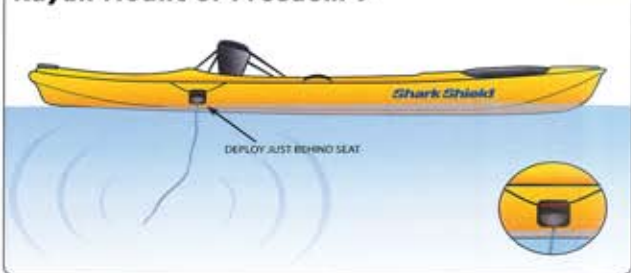

Ultimate carry case and storage protection for your Shark Shield™ Safe, waterproof and convenient.

SU - 1806 SHARK SHIELD TESTING UNIT

A simple device for both retailers and customers to check and confirm the unit is manufacturing a protective field.

Kayak Mount of Freedom 7

'proven protection'

Shark Shield™ is a unique shark deterrent system utilising a technologically advanced three dimensional electrical wave form. Shark Shield™ technology is available for recreational users and water sports professionals to help all people enjoy the water with a new dimension – peace of mind; for themselves, their families and employees.

Shark Shields™ can be used when participating in any ocean activities including surfing, snorkelling, scuba diving, free diving, spear fishing, commercial diving, kayaking, ocean swimming and boating or fishing.

FREQUENTLY ASKED QUESTIONS

Does the Shark Shield™ attract sharks?

NO! All free swimming sharks rely on various highly developed senses to detect and track their prey. In order of distance, the senses triggered are smell, sound, sight and at very close distances only, electrical impulses.

Because of the laws of physics, the electrical signal from the Shark Shield™ decays rapidly in the water. A shark is therefore only attracted to the source by its long distance senses, being scent and sound - not by the Shark Shield™.

The electrical field generated by the Shark Shield™ does not replicate that given off by a fish or seal and hence it is not recognised by a shark as a desirable or attractive stimulus.

What types of sharks does the Shark Shield™ deter?

Apart from some bottom dwelling sharks not considered dangerous to man, all predatory sharks are deterred. The larger and more aggressive sharks (such as a charging 18ft great white) are more easily deterred because of their advanced electrical sense.

SURF

The Shark Shield™ SURF is a compact light-weight unit designed specifically to be mounted on most watercraft including surfboards, kayaks, canoes and windsurfers. It can be easily transferred between surfboards with the purchase of additional mounting plates. The Mounting Plate is attached using the self adhesive. A deck grip kick patch is supplied to cover the Mounting Plate and give you added grip.

The unit incorporates a flexible antenna that contains two stainless steel electrodes. It is these electrodes that emit the protective field once submerged.

The SURF antenna has been designed to cause minimum water resistance. The electronics unit fits over the leg rope attachment and hinges to allow for leg rope access.

*3 - 5m Shark Exclusion Zone (from Antenna)
Under 355grams (Including Antenna)

FREEDOM7

- Swimming
- Spearfishing
- Bodyboarding
- Snorkelling
- Scuba Diving
- Boating
- Fishing
- Kayaking

The Shark Shield™ FREEDOM7 is a compact, versatile and light weight personal shark deterrent system which allows you to explore and enjoy the oceans without fear. It's designed for all water sports including, swimming, spear fishing, bodyboarding and snorkelling, and is the preferred product for scuba divers. The Shark Shield™ FREEDOM7 is fitted to the ankle region with the supplied neoprene and velcro pouch.

The unit incorporates a velcro pouch, that is attached to the ankle region and 2.2m flexible mesh antenna. Once the antenna is submerged in salt water the electrodes emit the protective field.

The FREEDOM7 antenna has been designed to cause minimum water resistance and drag on the user. This is an ideal dual purpose unit which also caters for the boating industry who can deploy the unit 1 meter under a polystyrene buoy tethered 2 - 3 meters from the boats transom or aft the duckboard.

"Shark Shield Works."

L. Tipple

Marine Biologist and professional Shark Diver, Luke Tipple, has spent the last 10 years working with sharks. He has shared his extensive knowledge with thousands of adventure seekers through his shark diving operations and has worked with Discovery Channel, MythBusters, Spike TV, Ushuaia Nature, and Government agencies as an authority in safe shark interactions. Luke is also the Director of the Shark-Free Marina Initiative which promotes shark conservation world-wide.

"Since being introduced to the Shark Shield™ I've tested it on a range of species including Tiger sharks, Hammerheads, Lemon, Bull and the Great White Shark. I've witnessed its effectiveness in deterring an investigation from these animals and I consider it part of my everyday safety strategy."

Luke hails from Adelaide Australia and makes his living travelling and diving with predatory shark species world-wide. With thousands of dives in the most extreme conditions for both work and play Luke Tipple recommends and dives with Shark Shield™.

"In my line of work we want to get up close and personal with these apex predators, but that isn't desirable for most people. The Shark Shield™ exploits a sharks' infamous and highly adapted electrical senses, deterring them from investigating someone further. It's an amazing piece of engineering and should be considered by anyone looking for that extra piece of mind while swimming, diving or surfing in the ocean."
